Gary,

During the review of the 106 FY 2012 End of the Year Grant Report, I raised some concerns. I provided written comments and also gave you and your team a heads up during the QEM held in February 2013. Most, if not all the concerns, are applicable to the FY 2013 Grant because the language in the 2012 grant carried over into the 2013. I'd proposed to address these concerns in the FY 2014 grant application process.

I've been able to get input on from various EPA folks on potential solutions, and would like to walk through them with you during this meeting and seek your input. We are assuming that MDE has already prepared the grant application for submission and will be submitted momentarily. We are proposing that EPA would provide comments on the grant application package once submitted that would reflect the discussion during this meeting.

You may want to have the following documents available during the meeting.

EPA FY2012

One last thing, please provide a number for which EPA can call you, Gary. EPA can call up to 6 lines from our phones, so other participants from remote locations can send me a phone number to call as well.

Thanks,
Ashley
